1 Gang Smart Touch Switch

ATK-STS05Z

SmartHome 1 Gang Zigbee Smart Touch Switch without Neutral

Key Properties

- Simple setup and easy pairing
- Remote Control
- Tempered Glass
- Touch Control Button lit up in darkness
- Long Product Life

Description

Antik 1 Gang Smart Touch Switch is used to control lights in your house or flat, or wherever you need it. It can be operated by touching the switch or via Antik SmartHome APP.

Features

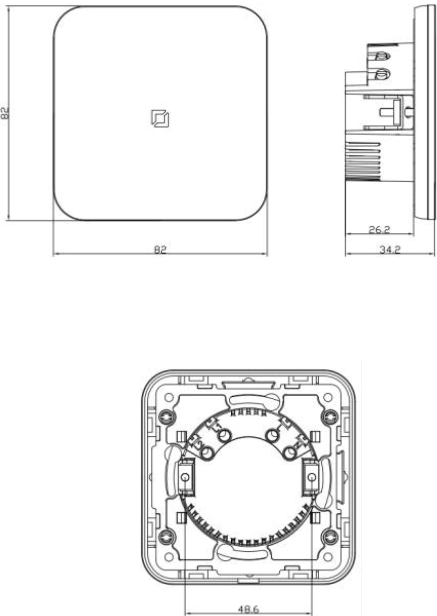

Timing Function Schedule the smart Zigbee touch switch to automatically turn the lights or other devices on and off based on the time you set. Saving power eliminates unnecessary standby power, preventing overcharging and overheating, saving power costs, and extending the life of the product.

Remote Control Control your lights and devices conveniently via smartphone and tablet - anywhere and anytime. No hub or monthly fees required. The tempered glass touch screen panel with LED indicator helps to find the position of the switch easily in darkness. Touch function should work flawlessly of up to 20 million times.

Sensitive Touch Control Unlike most similar products, the Touch Switch has a smart TOUCH CONTROL button. Stylish, sleek, flat surface that shines in the dark by the LED light will definitely be a stylish addition to your room decor.
